

UNIVERSITY OF NEW BRUNSWICK
SAINT JOHN

Marine Semester 2009

Huntsman Marine Sciences Centre
St. Andrews, NB

September 8 - November 30, 2009

An intensive, 12-week immersion semester offered in a marine setting and providing students with "hands-on" study experience of diverse marine organisms, including mammals, algae, fish and invertebrates.

The semester involves lectures, research seminars, discussions, labs, field trips and independent research projects. It is designed to promote critical thinking and expose students to innovative research in marine biology.

Courses Offered in 2009

Diversity, Habitats and Sampling Methods of Marine Organisms
Adaptations of Marine Organisms
Seminars and Readings in Marine Sciences
Current Topics in Marine Sciences
Directed Studies in Marine Sciences
