Welcome to the 2016 – 2017 Annual Report of the Huntsman Marine Science Centre. The Huntsman has grown and developed since our founding in 1969, and this past year marks another of significant growth and development. This year has been one of growth for the Huntsman. Our full time staff jumped from 40 to over 60 people, making the Huntsman the largest employer of people in St. Andrews. Increases in participation across all departments resulted in revenues of over $4 million. This has allowed the management team to make key investments in new and renovated infrastructure – critical to the sustainability of our operations, and most of our economic activity directly benefits the goods and services purchased by the area (over $4 million worth of goods and services purchased in 2016 from area suppliers). The success of the organization has grown and developed since our founding in 1969, and this past year marks another of significant growth and development. This year has been one of growth for the Huntsman. Our full time staff jumped from 40 to over 60 people, making the Huntsman the largest employer of people in St. Andrews. Increases in participation across all departments resulted in revenues of over $4 million. This has allowed the management team to make key investments in new and renovated infrastructure – critical to the sustainability of our operations, and most of our economic activity directly benefits the goods and services purchased by the area (over $4 million worth of goods and services purchased in 2016 from area suppliers). The success of the organization.

The Aquarium has continued to look for connections in the academic field and is developing a relationship with several universities in the region. The Huntsman Upper Campus is where historic and culturally important exhibits can be found. The ship was built in 1952 as a buoy for the Atlantic salmon broodstock from the Huntsman to commercial facilities in PEI. The vessel remains a historic Canadian salmon broodstock vessel and is an important component of the Canadian salmon broodstock program. The Huntsman continues to provide Universities with the facilities they need to run their field programs. The annual report to the Board of Directors for the fiscal year 2016-2017 has been submitted to the Board of Directors of the Huntsman Marine Science Centre. The report includes highlights of the organization's activities and financial statements for the fiscal year ending June 30, 2017. The report has been reviewed and approved by the Board of Directors.

The Aquarium has had an excellent year in its educational, inspired and enriched community. Nearly 30,000 visitors came through the doors, including students, families, and individuals from all over the world. The Aquarium continued to focus on community outreach through its “Aquarium in schools” program, which has hosted over 2,500 visits to schools and community centers. The Aquarium is also working with local schools to develop educational programs that are tailored to the needs of the students. The Aquarium is dedicated to providing educational programs that are engaging, informative, and enjoyable for all ages. These programs are designed to help students learn about the marine environment and its importance to our planet. The Aquarium is committed to providing these programs at no cost to the schools and community centers in which they are held.
