Canada’s Bay of Fundy is an excellent outdoor classroom. The daily cycle of the eight meter tide stir up nutrients which provide the essential base for many marine food chains. Twice a day as the tide recedes the ocean floor is exposed allowing terrestrial creatures, like us, to explore. Join us as we venture out into this unique environment to see what we can discover and what the tide has left behind. What we catch and collect is what we will observe more closely back in the lab when the tide returns and covers our playground.

Discover:
* the wonderful and unique biodiversity of our local ecosystems
* drifting plankton community that starts most marine food chains
* marine invaders new and old
* art and photography skills you didn’t know you had
* St. Andrews-by-the-sea maritime connections past and present

The course starts with registration Tuesday, July 21 at 1pm and finishes after lunch Friday, July 24th at 1pm.
Course Fee: Double occupancy $499/person; Triple occupancy $450/person; Quad occupancy $399/person
Fee covers: three night ensuite accommodation (rooms have two queen-sized beds), meals from Tuesday supper to Friday lunch, all instructional fees, boat and lab rental, aquarium admission, taxes.
You just need to find your way to St. Andrews, NB.

Stay in your own home option also available.
